

Premier Magnetics Appoints Dennis Earley As President

Dennis Earley's responsibilities for strategic leadership and direction of company's domestic and global operations is effective on August 1, 2020; his promotion from vice-president and general manager announced by CEO and company founder, Jim Earley

Lake Forest, CA—July 15, 2020—[Premier Magnetics](#), global producer of high-quality magnetic components for a wide range of power conversion and communications applications, is pleased to announce the promotion of Dennis Earley to the position of the company's president. Dennis Earley, who has served as Premier Magnetics' vice president and general manager since September of 2017, takes over responsibility for corporate strategy and global operations, starting August 1, 2020.

*New Premier Magnetics
President Dennis Earley*

This seamless leadership transition is the result of a thoughtfully planned succession. Dennis succeeds Jim Earley who founded the company and has served as president since its inception in 1991. Jim will continue to serve the company in a senior advisory capacity as chief operating officer.

"Dennis has played an integral role in the evolution and development of our business," said current Premier Magnetics President Jim Earley who announced the appointment. "He has a deep understanding of the electronics industry and has demonstrated exceptional leadership as our vice president and, before that, as sales manager. We will benefit from his experience and forward-looking vision as we continue on our path of profitable growth."

About Premier Magnetics

Incorporated in 1991, Premier Magnetics (www.premiermag.com) is a leading, multinational company focused on the design and manufacturing of a broad range of magnetics components, including power conversion magnetics, LAN & telecom magnetics, MIL-STD-1553 Data Bus Transformers, and DC/DC converters. Committed to providing the highest quality products and shortest cycle times at the most competitive cost in the industry, Premier products are found in many mission critical programs and support medical, computer, industrial, lighting, and Pro A/V applications, as well as various government and military agencies around the world. Sales and distribution offices are worldwide, with manufacturing locations in Southern California, Taiwan, Vietnam, and China.
