

LinkCom's TRI Series LED Drivers Combine TRIAC and 0-10V Dimming Functions

UL 8750 Class P drivers facilitate retrofit of LED lighting into circuits with TRIAC dimmers

WALNUT, CA.—September 28, 2018—[LinkCom Manufacturing](#), a world-class manufacturer of power supplies and magnetic components, announces the availability of its [INCORE Brand TRI Series](#) of LED power supplies designed to provide a simple interface between conventional TRIAC dimming controls and LED lighting fixtures. Offering models with nominal ratings from 5W to 13W, the TRI Series facilitates retrofitting of LED fixtures and lamps into circuits initially designed for incandescent lighting. The units are compatible with both leading- and trailing-edge 120VAC TRIAC dimmers. In addition, the TRI Series provides 0-10 VDC dimming control for lighting operating from 120V – 277 VAC sources.

Packaged in a compact IP67 compliant enclosure, the TRI Series is suitable for both indoor and outdoor applications including track lighting, wall sconces and architectural illumination. The units provide superior, flicker-free performance meeting JA8/JA10 qualification requirements; they feature built-in power factor correction and short-circuit protection and are UL 8750 Class P and FCC Part 15 Class B compliant.

Newman Chen, LinkCom's director of North American operations, commented: "A cost-effective method for reducing energy use is the replacement of incandescent lighting with LED fixtures providing equivalent or better illumination at a fraction of the energy. Many such circuits employ TRIAC dimmers. The TRI Series makes this conversion simple and cost-effective."

About LinkCom Manufacturing

LinkCom, Inc., is a global source of the highest quality magnetic components and power supplies. Founded in 1988, LinkCom has earned an industry-wide reputation for excellence by focusing on producing high-efficiency and high-quality products and first-rate customer service. LinkCom's advanced manufacturing 50-acre complex in the Dongguan East Technology Industrial Area in central Guangdong province, China, features the latest in automatic production equipment and advanced RoHS control.
